

KEEP YOUR CHILDREN SAFE

Inside Safety Tips for Kids:

- Don't play with electrical cords or plugs.
- Never pull or tug on a cord.
- Don't touch or use cords that appear damaged.
- Keep cords away from heat and water.
- Never stick body parts or objects into electric outlets or light sockets.
- Never sleep with phones, tablets, or other electronics in the bed or under a pillow.
- Never play with electronic toys or gadgets in the bathtub or other water.
- Never touch appliances, switches, outlets, sockets, cords, or plugs with wet hands or while standing in water.

Outside Safety Tips for Kids:

- Look up and look out for power lines.
- Be aware of power lines around pools.
- Do not touch or go near a sagging or downed power line. Tell an adult to call the electric utility to report it.
- Never climb trees near power lines.
- Fly kites, model airplanes, drones, and remote-control flying toys in large, open areas away from power lines.
- Never climb a utility pole or tower.
- Never go into an electric substation for any reason.
- Always stay away from outdoor electrical equipment marked “Keep Out,” “High Voltage,” or “Danger.”
- Do not play, sit, or climb on a pad-mount transformer, a.k.a “green box.”
