

feeling chilled?

HEAT YOUR SPACE SAFELY

Place on a flat, level surface

Keep flammable items at least 3 feet away

Make sure the cord is not frayed or cracked

Plug it directly into an outlet

Do not use an extension cord or power strip, which can overheat

Follow all instructions and use models endorsed by a reputable testing lab

Do not use around small children or pets

Do not use one with a damaged plug or prongs

Are portable space heaters efficient for your home?

Small space heaters are meant to do exactly as their name says: heat a small space. But using a portable space heater to heat your entire home can really take a toll on your energy bills. For example, **running two 1,500-watt space heaters for eight hours could add up to \$100 to your monthly power bill.**

Only use a space heater in small spaces that you're occupying and, if possible, try to shut off other rooms to contain the warmth provided by the space heater.

Maybe consider alternative ways to stay warm like extra layers of clothing or UL-approved electric blankets. If you have hardwood or tile floors, lay down area rugs to provide additional insulation and maintain warmth.

If you're looking for ways to save energy and increase comfort in your home, contact us at 888-267-2726.

We're here to help you manage your energy use.
