Enjoy a COZY and SAFE winter with these electric blanket and space heater tips

- Read and follow the manufacturer's instructions.
- Choose products with a safety certification, such as Underwriters Laboratories (UL).
- Plug heating devices directly into a wall outlet.
- Electric blankets are designed to provide warmth, not to replace home heating.
- Space heaters should only be used for supplemental heat in small areas. Do not use space heaters to warm your entire home.
- Keep heating products dry and away from water.
- Turn off and unplug heating devices when they are not in use.
- If a product sparks, smokes, or overheats, stop using it immediately.
